[EN] THERMOMETER. Please read the manual before use (attached inside). ONLY FOR INDOOR USE. Runs on battery: LR44 Batteries included to the product. Instruction of use. Do not place the product where it may be damaged. A damaged set cannot be repaired and must be disposed of according to the WEEE instructions. Do not let children touch or disassemble the light string. Waste electrical equipment may not be disposed of with municipal waste, as signified by the crossed out waste container symbol. Products marked with this symbol must be separately collected and recycled in designated collection points. The presence of hazardous components in the equipment may potentially be harmful to the environment, e.g. cause contamination, and as a result pose a risk to human health. Proper sorting of waste in households plays a major role in the recycling process of waste electronic equipment. Following the rules of separate collection ensures a sufficient level of human health and environmental protection. Insert the batteries correctly with regard to their polarity. Do not recharge non-rechargeable batteries. Dispose of waste batteries into designated containers; do not dispose them with municipal waste. Do not mix different types of batteries. Do not mount new and used batteries simultaneously. Protect against the ingress of water. Do not dispose of used batteries in a fire. Keep batteries away from children. Material: ABS+Glass display screen+PCB

PRODUCT DIAGRAM

SAFETY INSTRUCTIONS

- Can only be used in the temperature range of -10 °C to 50 °C and humidity range of 10%RH to 90%RH
- Do not expose the product to water or chemicals.
- Digital electronic for measuring temperature and humidity for indoor use only, used by pulling out the insulating sheet completely.

MEASUREMENT ACCURACY

Temperature measurement range: -10 to 50 °C

Temperature measurement accuracy: ± 1 °C

Humidity measurement range: 10%RH to 90%RH

Humidity measurement accuracy: ± 5 %RH

TECHNICAL DATA

Battery: Alkaline manganese battery LR44, 1.5V

USE

Mounting Options: It can be stuck onto a smooth surface with use back adhesive, hung on the wall through the hanging hole on the back, or placed directly on a table.

Face Icon Comfort Indicator: Humidity temperature gauge features face icons to indicate DRY/COMFORT/WET, quickly informs you how to adjust your humidifier or dehumidifier to achieve optimal comfort.

Function Description: When the temperature is between 20°C-26°C (68°F-78°F) and the relative humidity is between 50%RH and 70%RH, "COMFORT" is displayed. When the relative humidity is above 70%RH at any temperature, "WET" is displayed. When the relative humidity is below 50%RH at any temperature, "DRY" is displayed. When the temperature is below 20°C (68°F) or above 26°C (78°F) and the relative humidity is between 50%RH -70%RH, there is no comfort display.
